

# PROJECT - 3

## DAMG 6210 - DATA MANAGEMENT DATABASE DESIGN

### Modified ER diagram:

## **Business Rules**

- When a user registers, they will select their type which is owner, player or spectator.
  - The user type cannot be null (NOT NULL).
  - Password will be in encrypted format.
  - User ID is the primary key
- Every Owner can have only 1 team.
  - The Budget for each team is 10 million USD.
  - Team Name cannot be null (NOT NULL).
  - User ID is the foreign key.
  - Unique constraint is enforced on owner\_id field.
- Every Owner can bid on multiple players.
  - Time Limit for a bid is 2 minutes.
  - The Owner who bids the maximum amount for a particular player gets them.
  - IS\_FINAL\_BID is updated to true for the latest entry once bidding is completed indicating that the player is sold.
  - Bid ID is the primary key and Owner ID, Player ID are the foreign keys
- Payment is made to the player after bidding is confirmed.
  - Payment (Final BID amount) is processed when IS\_FINAL\_BID is true.
  - Payment ID is the primary key. Bid ID, Player ID are foreign keys.
- Every player has a base price
  - Owner can place a bid on a player for an amount which is more than the base price.
  - Player has a country which determines if he is a foreign player or a domestic player.
  - Player ID is the primary key.
  - User ID and Team ID are the foreign keys.
- A Team can have a maximum of 25 players and at most only 8 of them can be foreign players.
  - Player Name must be unique and not null.
  - Team ID is the primary key. Owner ID is the foreign key.
- A team will have a captain and a home ground.
  - Team Name must be unique and not null.
  - Captain is the foreign key and of the players.

- Matches will be held according to the schedule and result of each fixture is stored in Team Standings.
  - The winner is the team with maximum victories(Highest points).
  - League ID, Match ID, Venue ID are the foreign keys in the Schedule Table
  - Match Date should be within the FROM and TO dates of the League.
  - If there is a tie between top 2 teams, there will be another match held between those teams.
  - Default Value of Matches\_won, Matches\_lost, Matches\_Tied is 0 ( NOT NULL ).
- Details of the league matches held till now are stored in the League Table
  - League Name cannot be null.
  - League ID is the primary key which indicates the year in which the league is being held
- Cost of the ticket is based on the type which the spectators choose.
  - There are three types of tickets. PLATINUM ( 100 USD) , GOLD ( 50 ), SILVER ( 30 )
  - The maximum tickets which can be sold is based on the capacity of the venue
  - Each Spectator is allowed to book a maximum of 10 tickets.

## **Views:**
